

Ambu® aScope™ 4 RhinoLaryngo Intervention

DATASHEET

With its 2.2 mm working channel, the aScope™ 4 RhinoLaryngo Intervention endoscope is an excellent choice for therapeutic procedures.

It is ready when you are, requires no post-procedural handling and comes at a low investment cost, which makes it particularly suitable for outpatient-clinic biopsies.

HD imaging helps you perform procedures confidently

The combination of the high image quality from the aScope™ 4 RhinoLaryngo Intervention with the full-HD Ambu® aView™ 2 Advance monitor delivers quality imaging. You can count on clear sharp imaging, which makes it easier to identify anatomical structures.

Single-use efficiency streamlines your workflow

The RhinoLaryngo Intervention solution provides uninterrupted availability of channelled scopes whenever needed and there is no turnover time for reprocessing and cleaning.

KEY BENEFITS

Perform therapeutic procedures whenever/wherever you need to

High quality imaging on the full-HD monitor Ambu® aView™ 2 Advance

Always ready - avoiding any delays

Sound and slow motion recording is available when connected to the aView™ 2 Advance Generation 2

Low investment cost and complete cost transparency

A brand-new endoscope with the same high quality imaging at every procedure

SPECIFICATIONS

Optical system
